Wheelset support pads

Long lifetime: more than 2000 cycles Time saving: only one person needed

Developed according to the requests of UIC (International Union of Railways)

Wheelset support pads

Application

- Protection of flanges and wheel treads of wheelsets and bogies
- Storage and transport of wheelsets and bogies
- Suitable for diameters between 620 and 1060 mm

Advantages

- Long lifetime (up to 2000 and more cycles)
- Two integrated magnets helps to fix the support pads at the wheelsets
- Time saving and cost efficient
- Could be modified with your logo

| Fatigue tests | |
|---------------------|--------|
| Weight per wheel | Cycles |
| 1 ton | >2000 |
| 2 tons | >2000 |
| 4 tons | 500 |
| 5 tons | 50 |
| | |

Number of cycles needed to bring the flanges of the wheels in contact with the ground.

Innovative rubber support pads for a safe and quick transportation of wheelsets and bogies
